

Stubless Fiber Terminals

NetSource Stubless Fiber Terminals are perfect for any outdoor Fiber Optic Network. The stubless terminals are designed to withstand extreme environment and are tested in accordance with IP68 for water and dust ingress. This testing along with the proven reliability of OptiTap® technology offers optimum performance assurance with confidence.

The Stubless Fiber Terminal splitters are designed to accept a single fiber that can be split into 4 or 8 ports using a 1x4 or 1x8 splitter. The splitter design reduces the amount of distribution cables lowering the initial cost.

Features

- Available in 4 and 8 Port configurations
- IP68 rated for water and dust ingress protection
- Durable UV resistant construction
- Mounting hardware included for pole, aerial, or wall
