

# Network Interface Device (NID)

**NID Boxes are designed to protect fiber optic connectors and splices in indoor or outdoor environments.**

Each Network Interface Device (NID) enclosure has a built in, swing-out mini splice tray and a bulkhead panel with SC footprint adapter ports. The cable access ports feature built in weather-tight grommets that allow for easy cable installation.

The 2 port NID box is widely customizable. We will work with you to make sure it works for your specific needs.

## Features

- Accepts 2 SC or 4 LC connectors (Patch and Splice)
- Accepts 1x2 splitters
- Input up to 1x10mm and dielectric flat drop
- Output up to 4.8mm
