

# Power Cords

## Product Overview:

NetSource offers a full selection of high-quality power cords designed for data centers, IT environments, high-temperature conditions, and hazardous applications. Our inventory includes IEC and NEMA cords in a variety of configurations, lengths, gauges, and colors to support both North American and international installations.

## Insertion Loss:

- IEC connectors: C5, C7, C13, C14, C15, C19, C20, C21
- NEMA connectors: North American and international types
- Available in multiple gauges and lengths
- Jumper cables and power adapters available

## Environmental & Mechanical Properties:

- Suitable for high-temperature and hazardous environments
- Standards Compliance: RoHS and REACH

## Features & Benefits:

- Broad selection of connector types ensures global compatibility
- Multiple color options allow for easy cable identification and organization
- Jumper cables and adapters provide versatile connectivity options
- Available in various lengths and gauges to support different power loads
- Quick availability reduces downtime and streamlines installation
- Enhances system organization and troubleshooting efficiency
- Supports safe and reliable power distribution in demanding environments
- Helps maintain compliance with industry and environmental regulations
